

## Scientific works and publications using CWED data

This list exclusively contains peer-reviewed journal articles, monographies, and compilations (handbooks, edited volumes, etc.) written in English language using CWED or CWED2 data. Because of reasons of space, the vast numbers of dissertations, master's theses, and working papers are excluded.<sup>1</sup> The studies listed below all utilize measures from either CWED or CWED2 in the empirical analysis. Typically, indicators and variables of the dataset are used in large-N studies, although in some cases the data are used in other types of empirical analyses.
